4 Where to push spend

Source: Brand Analytics Search Query Performance, 27 Sep – 17 Oct (since the price cut).

Ratio = purchase share ÷ click share. Above 1×: W7 wins more than its share of sales. Below 1×: shoppers click, then buy elsewhere. W7 sales = calendars sold over the 3 weeks. Ad spend YTD = Sponsored Products spend on that exact search, 9 Sep – 20 Oct; cost per order is ad spend ÷ ad orders. **Green** = push, **amber** = hold or test, **red** = cut.

- Organic: page one (#1–10) on most beauty, makeup and teen searches. Page 2–3 on broad searches.
- Paid: over half of ad spend lands at the top of search, but that's the most expensive placement at $38 per order (section 6).
- Green searches: ~170k searches a week.
- "beauty advent calendar" (amber) has taken $4,100 of spend at $49 per order. Hold the bid and let the 2026 terms take the budget.

Where the ads appear

Sponsored Products placement report, advent calendar campaigns, 9 Sep – 21 Oct.

Top of search	$18,069	52%	$0.61	481	1.6%	$38	117%
Rest of search	$9,225	27%	$0.49	354	1.9%	$26	80%

Competitor product pages	$4,108	$27	87%
Auto	$1,040	$28	96%

- Over half of spend already goes to the top of search, even with no top-of-search adjustment set. It's the most expensive placement.
- The worst single spot: the general "advent calendar" campaign at the top of search, with $7,858 spent at $56 per order.
- Rest of search is the cheapest on-Amazon placement at $26 per order.
- Low top-of-search *share* (2–7% on the main keywords) reflects how big these searches are, not a lack of spend there.

Has the spend helped ranking?

6–12 Sep	$225	5	$31.99	133,554
13–19 Sep	$1,100	48	$31.99	80,512

18–20 Oct	~$2,000/day	–	$27.19	~6,500

- **Yes, up to a point.** Rank improved ~16× (133k to 8.3k) as spend scaled, and organic sales rose from ~7 to ~41 a day.
- The biggest jump came in the week spend doubled *and* the price dropped. The two effects can't be separated.
- Since 17 Oct the rank has held at ~6,300–6,600 while spend runs at ~$2,000 a day. Extra spend is no longer buying rank.
- Rank is measured in Home & Kitchen › Home Décor. Sales rank: Keepa.

7 Actions

1. **General "advent calendar" campaign: cut from $1,000 to ~$200 a day.** Keep "advent calendar 2026" on exact match, low bid. Negatives: *needoh, squishy, dumpling, chocolate, lego, for adults, amazon beauty advent calendar, amazon advent calendar*. Saves ~$800 a day. Currently $43 per calendar.

2. **Green searches: exact match, raise bids on the cheapest-converting terms.** *makeup advent calendar 2026* ($17 per order), *make up advent calendar 2026* ($12), *beauty advent* ($12), *luxury beauty advent calendar 2026* ($23), plus the teen and women searches at $9–19. No blanket top-of-search boost: in the Beauty Blast keyword campaign, top of search costs $34 per order against $24 lower down the page.
   Page one organically. Purchase share above click share.

3. **Competitors: expand product-page targeting** to the top Sephora, Ulta, e.l.f., L'Oréal and Revolution calendars. Brand-name searches: small test only (Sephora and e.l.f. convert at about half the market rate).
   Rival calendars cost $60–95; W7's is $27. Product pages run at ~$23 per calendar today.

4. **Spanish: add** *calendario de adviento maquillaje* and *calendario de adviento*.
   ~42k searches a week. Page one. Ratio 1.9–4.1×.

5. **Placements: lower bids where top of search runs above target.** Start with the general "advent calendar" campaign ($56 per order at the top of search). Use a rest-of-search adjustment rather than a top-of-search one on the beauty keywords.
   Rest of search sells at $26 per order; top of search at $38.

6. **Target ad cost: $10–12 per calendar**, depending on margin.
   Currently $22–43.

7. **Sponsored Brands video ($1,400 a day): restrict to green and brand searches.**
   Largest budget. Brand searches: 70–90% purchase share.

8. **Category: open a Seller Support case to move the calendar and Holiday Haul to Makeup Sets.**
   Better traffic match. Best Seller badge eligibility.

8 Targets for the next 2–3 weeks

Measure	Now	Target
Ad spend as a share of total calendar sales	~63%	25–35%
Ad cost per calendar	~$29	$10–12
Conversion rate (all traffic)	2.5%	3%+ after the category move (UK: ~5%)
Calendars sold per day without an ad	~41	Rising
Ad cost per order, top of search	$38	under $20

Summary: the product, price and reviews are working, but the ad budget is going to the wrong searches. Cut broad and off-target spend. Put the budget into the beauty searches and rival product pages that sell for under $25 an order. Move the category. Aim to finish before the late-November peak.

Organic = total minus ad-attributed sales. Part of the growth is seasonal. Sources: Seller Central, Brand Analytics, Amazon Ads, Keepa, Jungle Scout.
